Cat

Pharmaceutical

Used to Treat External Parasite Infections Like: Flies, Ticks, Mites, Lice, Fleas, Mosquitoes

DOSAGE AND ADMINISTRATION:

- Wet the animal body with warm water - Protect eyes & ears - Apply enough amount of the Shampoo over the entire body of animal
- Allow 10 minutes of contact time - Rinse thoroughly with water

INDICATIONS:

Cypermethrin is Broad spectrum, non-systemic ectoparasiticide for dogs, cats, cows, and other animals, used to treat external parasite infections like: flies, ticks, mites, lice, fleas, mosquitoes, and others.

Cypermethrin acts on the nerve cell membrane, disrupting the sodium channel current, causing paralysis and death of the parasite. Cypermethrin also exhibits residual ovicidal activity after rinsing. Cetrimide is a quaternary ammonium antiseptic with bactericidal action against gram positive and some gram-negative organisms, but ineffective against bacterial spore. It has variable antifungal activity and is effective against some viruses. Cyper shampoo is an effective way of controlling ticks and other pests and providing good residual efficiency.

COMPOSITION:

Each 1 ml contains:
Cypermethrin 1%
Cetrimide 1%

WITHDRAWAL PERIOD:

None

250 ml

(below 30° C)
