Move-Myco spray

>

Rabbit

>

Cat

Dog

Used for Mycosis prevention and treatment.

INDICATIONS:

The product contributes to the formation of a natural protective barrier of the skin, counteracts the penetration and growth of mold and mildew.

The product supports the treatment of mycosis typical locally on your pet's skin.

The healing effect results from Copper chloride and natural tea tree oil.

Propolis extract protects affected skin areas from infections and accelerates the healing process of wounds.

Addition of tea tree oil also gives the preparation antifungal properties.

Move-Myco spray is a usable aid recommended for mycosis prevention and treatment.

COMPOSITION:

Copper chloride, Propolis, tea tree oil

WITHDRAWAL PERIOD:

None

50 ml

(below 30° C)

DOSAGE AND ADMINISTRATION:

Thoroughly cleanse and dry area of skin to be treated.

Apply Move-Myco spray directly to the skin 2-3 times daily, repeat for several days, until completely healed.
