NEW

MODERN Vitamin E with Selenium

HORSE

Pharmaceutical

Horse Powder

DOSAGE AND ADMINISTRATION:

For adult horses: 2 scope per day (approximately 50g)

It is recommended to divide the amount into two feedings: 1 scope in the morning and 1 scope again in the evening.

For ponies horses: 1 scope per day (approximately 25g)

It is recommended to divide the amount into two feedings: ½ scope in the morning and ½ scope again in the evening.

Does not contain any sugars, it is safe to feed your horse daily
Safe for easy keepers, borderline overweight, and/or
insulin-resistant horses

Directions: We recommend you mix Electroderm Horse with the feed. However, Electroderm Horse will dissolve in water as well. Fresh water and a salt block or loose salt should always be free choice for your horses
